

U.S. AIR FORCE

AF SERIAL NUMBER TRACKING (SNT)

Colquitt Lawrence
AF/ILGP
DSN 225-2274, 17 Mar 04

U.S. AIR FORCE

Overview

- **Mission**
- **DoD Background**
- **Unique Item Identification**
- **AF Background**
- **Benefits**
- **Big Picture**
- **Implementation**
- **Focus Areas**

Integrity - Service - Excellence

U.S. AIR FORCE

Mission

- **Design and implement an enterprise Serial Number Tracking (SNT) and management capability for the USAF**
- **Coordinate with other organizations and services for DOD SNT program implementation**

U.S. AIR FORCE

DoD Background

■ **Requirements**

- ODUSD(L&MR) memo: Serialized Item Management (SIM) of Equipment Maintenance - 4 Sep 02
- ODUSD memo: Policy for Unique Item Identification (UID) of Tangible Items - New Equip, Major Mods and Procurements of Equip and Spares - 29 Jul 03
- UID becomes a mandatory DoD requirement on January 1, 2004

■ **Benefits**

- Integration of item data across all agencies, FMEA
- Improved item visibility, management and accountability (CFO Compliance)

Unique Item Identification

U.S. AIR FORCE

- **What is UID?**
 - **Discrete item identifier (like a Social Security Nr)**
 - **Tangible contract deliverables over \$5K, serially managed, mission essential, controlled inventory, or determined to require UID by Program Manager**
 - **UID currently not mandated on in-service assets**
- **Valuation**
 - **UID items will have contract line item delivery price**
 - **UID parts will be individually priced**
- **SNT will track and analyze select items throughout their life cycles to improve sustainment for warfighter**

USAF Background

U.S. AIR FORCE

■ **Requirement**

- **AF CONOPS for Serial Number Tracking (SNT) and Product Marking signed - 27 Feb 03**
- **HQ AF/IL letter to MAJCOMS and AFMC/CV - 9 Apr 03**

■ **USAF SNT Team**

- **Design AF SNT program to implement DoD policy**
- **Co-Championed by HQ AF/ILI, Mr Grover Dunn and OO-ALC/LG, Mr Gene Hathenbruck**
- **Co-Chaired by AF/ILI, Ms Linda Barnwell and AFMC/LGI, Col Loraine Simard**

■ **USAF AIT PMO**

- **Provide standards and technological options/data collection solutions for marking**

U.S. AIR FORCE

SNT Benefits

■ **Acquisition/Engineering**

- Part Mark, Birth Certificate, Warranty Management, OSS&E, Configuration Management, Safety of Flight/High Dollar/Time Critical Item Management

■ **Supply**

- Inventory Accuracy, Materials Management, Item Visibility by SN, Fraudulent Part Identification

■ **Transportation**

- In-Transit Visibility, Track Transportation Method/Damages

■ **Maintenance**

- Item Visibility, Cost Control, Repair History, Bad Actor Identification (MTBF), Quality Deficiency Report Tracking, Improved Bills of Material, Engine Stub Time Management

■ **Disposal and Reutilization**

- Hazardous Materials/Precious Metals Tracking, Demilitarization, Prevent Inappropriate Re-entry of Parts - Surplus/Excess

U.S. AIR FORCE

Big Picture

“Tracking” part of Serial Number Tracking

“Application” enabled by Serial Number Tracking

Automated Information Systems

**Manufacture/

**Outbound
Transportation**

Maintenance

Disposition

Part mark is common thread

- Production Traceability

- In-Box ITV

- In-Storage visibility

- In-Box ITV

- On/Off Equipment visibility

- Provide item history to buyer

- Birth Record
- Warranty
- ID Defects
- Configuration Mgt

- Locate Asset
- Match transportation method to item

- Maintenance pull by S/N
- Locate Asset
- Capital Reporting
- In-use Equip

- Locate Asset
- Match transportation method to item

- Trend analysis
- Manage configuration
- Warranty
- Bad Actors

- Properly DEMIL

- SAP
- G009

- CMOS
- GATES
- GTN

- SATS
- ILS-S
- SCS

- CMOS
- GATES
- GTN

- Locate Asset
- CEMS
- CAMS

- DRMO
- ITS, PDMSS

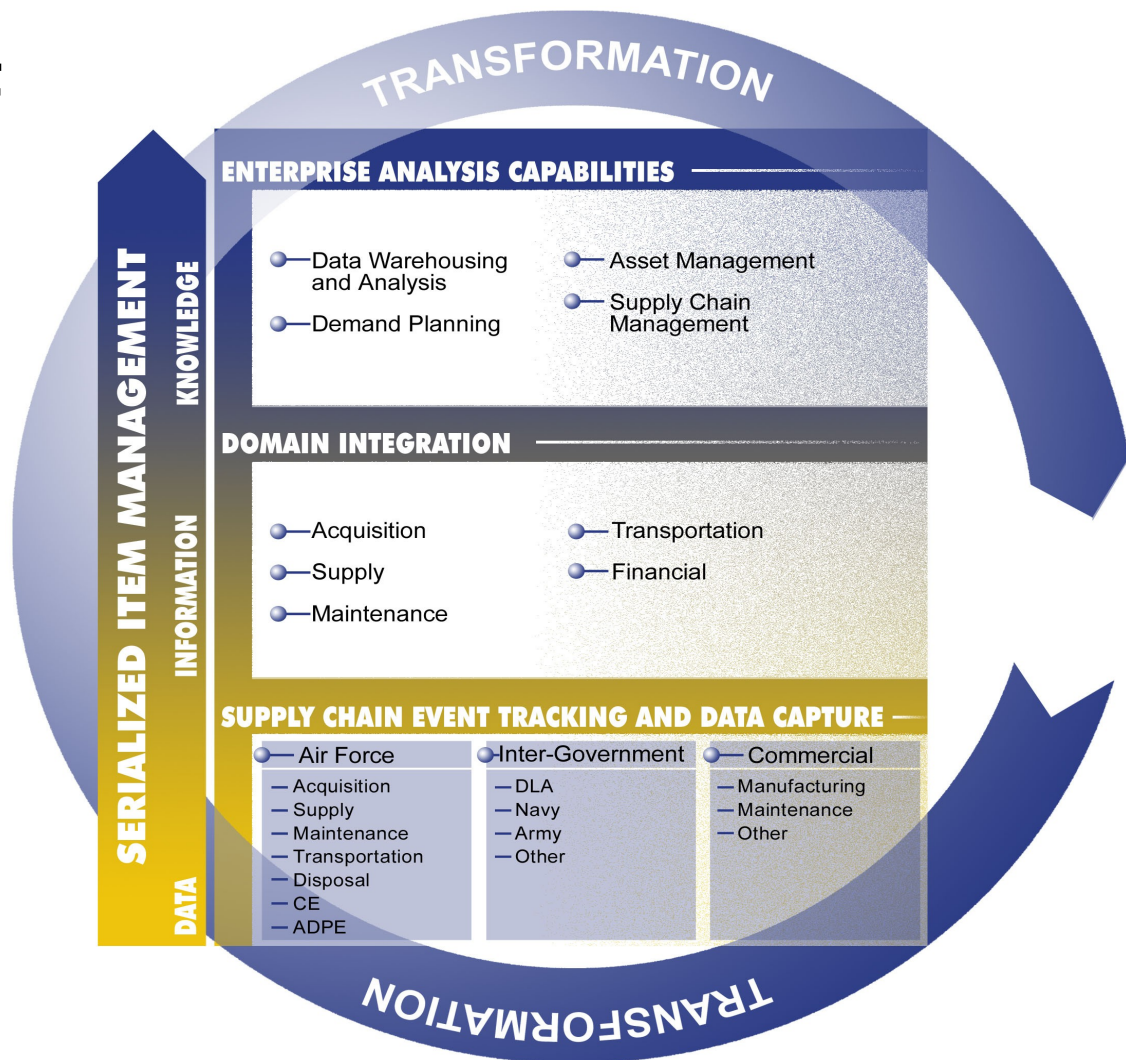

Integrity - Service - Excellence

Operational Architecture

U.S. AIR FORCE

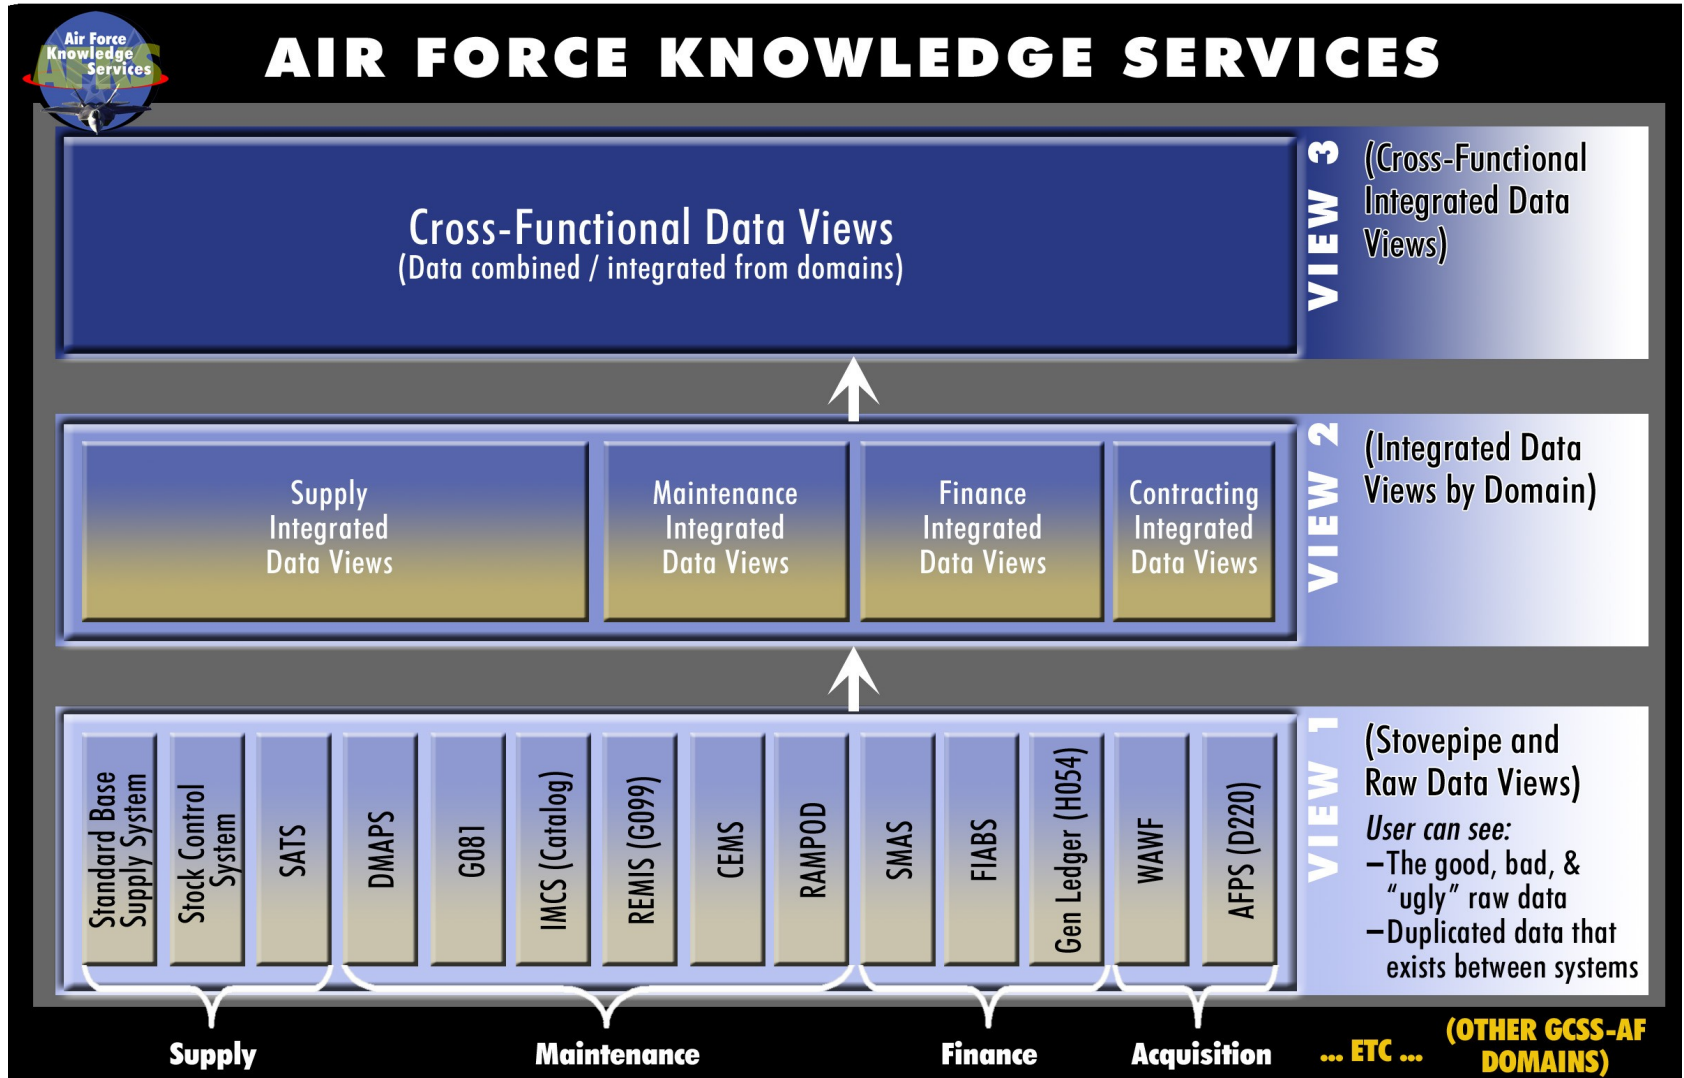

- Supply Chain Event Tracking
- Domain Integration
- Enterprise Analysis Capabilities
- Serialized Item Management
- Transformation

Systems Architecture

U.S. AIR FORCE

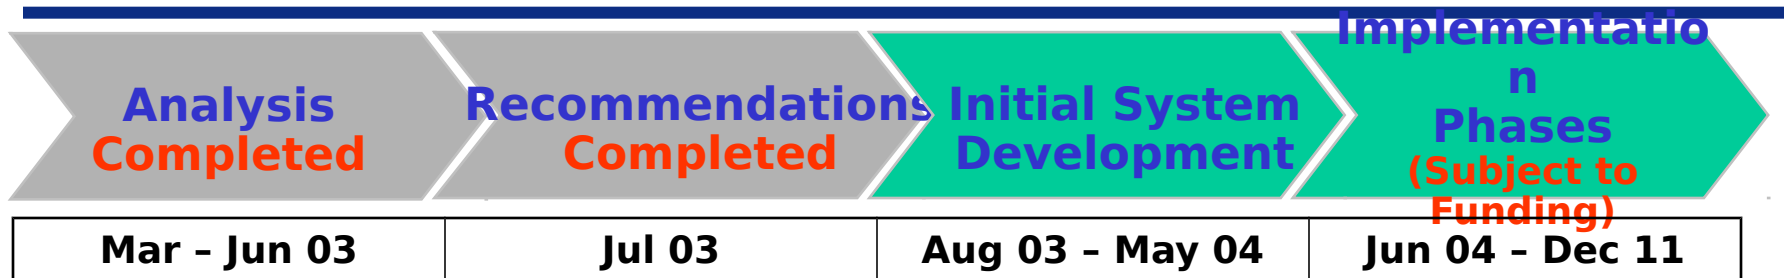

Integrity - Service - Excellence

SNT Implementation

U.S. AIR FORCE

Analysis

- Draft Charter
- Draft Roadmap
- Review Existing Requirements
 - AF, DoD, DLA, Other Services
- Determine "As Is"
 - Analyze Current Processes
- Design "To Be"
 - Review existing programs
 - Determine Implementation order
 - Estimate Benefits

Initial Draft Implementation Plan

- SNT Analysis
- Communication Plan
- Integration Plan
- Requirements
 - Hardware/Software
 - Marking Quality Compliance
 - Training

Concept Demonstration

- Data/System Interactions
- Operational Simulations

Pilot Program

- Draft Pilot Programs
- Funding Estimates
- Coordinate w/ MAJCOMs

Deliverables

- Policy Guidance
- Refined Requirements
- FY06 POM Input
- Business Case Study
- Cost and schedule
- Final Imp Plan

Implementation Phases

(Subject to Funding)

Spiral Implementation

- **Phase 1 - Tracking and some analytical capability**
 - May 04 - Dec 05
 - Quick wins/"low fruit"
 - Initiate Pilots
 - Analyze Concept Demo
 - Update Imp Plan
 - Stand-up PMO
- **Phase 2 - More analytical capability**
 - Jan 06 - Dec 07
 - Important/Time consuming interfaces
- **Phase 3 - The rest of the analytical capability**
 - Jan 08 - Dec 11
 - Complex/Enterprise

U.S. AIR FORCE

Focus Areas

Funding

**Systems
Integration**

**Concept
Demonstrati
on**

**Pilot
Programs**

**AF SNT
Program
Office**

Integrity - Service - Excellence

U.S. AIR FORCE

Funding

- **Determine SNT funding requirements**
 - **Implementation Plan**
 - Systems cost estimates
 - **Business Case Analysis**
 - Workshop results
 - Survey results
 - Return on Investment estimates
- **Acquire funding for SNT implementation**
 - FY04 and FY05 fallout funds
 - FY06 POM input

U.S. AIR FORCE

Systems Integration

- Major AF Logistics Transformation Initiatives
 - PSCM, DMT, SC COP, LOG EA, etc
- Integration with legacy systems
 - REMIS, CEMS, ITS, CAMS, CMOS, SBSS, etc
- New evolving systems
 - EDW, ERP, MRO, APS, etc
- Locally developed SNT systems
 - DRILS, LDMS, C-5, C-17, etc
- DoD, DLA and Service SNT programs
 - UID, UITC, US Navy, US Army, etc

Acronym Test

U.S. AIR FORCE

Concept Demonstration

- **Alternatives on processes, people, equipment**
- **Simulates SNT process flows, resource profiles**
 - **Flow of arriving assets to be marked**
 - **Type of marking on asset**
 - **Time required to mark and verify**
 - **Engineering requirement**
 - **Rate of assets through the supply chain that require serial number scanning**
- **Supports planning for SNT implementation throughout AF logistics business processes**

U.S. AIR FORCE

Pilot Programs

- **Proposed pilot candidates**

CLS = Contr Log Support
TSPR = Tot Sys Perf Responsibility

- **C-17 avionics (CLS/TSPR)**
- **C-5 landing gear (organic depot)**
- **F-15/F-16 avionics (organic depot)**

- **Pilot concept includes**

- **DRILS (F-16) and LDMS (F-15) interfaces, other data systems as required**
- **Depot/contractor interface**
- **Base level (maintenance/supply/transportation)**
- **Incorporates UID/AIT policy**
- **Depth of pathfinders dependent upon funding**

U.S. AIR FORCE

AF SNT Program Office

- **Scope requires more than part time efforts**
 - **Integration of program with DoD, Services, AF, MAJCOMs, industry**
 - **Implement SNT, UID, Radio Frequency Identification (RFID) across AF**
- **Initial resources for SNT PMO**
 - **1 Mil, 3 Civ, 10 Contr**
 - **\$2.4M per year**
- **Possible location: HQ AFMC**
- **Desired timeframe: Jan 04 - Dec 11**
(or after implementation is complete)

SNT Summary

- **Major logistics transformation initiative**
- **AF/ILI and AFMC/LG lead**
- **Huge benefits across supply chain**
- **Significant implementation issues**
- **On track**
